

**AT ALTATERRA WE MAKE ROOF WINDOWS AFFORDABLE AND HAVE BEEN SUCCESSFULLY DOING SO FOR 20 YEARS. WE BELIEVE IN MAKING DAYLIGHT AND FRESH AIR AFFORDABLE TO EVERYONE, SO THAT MORE FAMILIES CAN ENJOY WELL-BEING AND A HEALTHIER LIFE AT HOME.**

We care about the impact our activities have on the environment, as well as our carbon footprint and our social responsibilities and whilst we know that individual companies alone cannot tackle climate change, we do believe that if an entire industry collaborates, we can make a difference.

The construction industry will always generate CO<sub>2</sub> emissions, but we are determined to forge a path to a greener, more sustainable industry. As part of that, it is our intention to create a sustainable business that is carbon neutral by 2030\*. Therefore, in partnership with VELUX, we are working in line with the Science Based Target initiative to transform the way we organize our business. We will be doing this across the three central areas, namely our operations, our products and our business practices, by embedding our sustainability strategy at all levels over the next eight years.

\*we are committed to reducing our operational emissions by 100% (Scope 1 & 2) and reducing emissions across value chain by 50% (Scope 3) by 2030.
